

TREE PLANTING

Our staff will inspect your property and make recommendations on tree species and quantity for your planting project. We will also research any available incentive programs to aid in funding your tree-planting project. Trees Ontario may subsidize your tree planting. Your payment could be as little as 15¢/tree for the tree purchase, planting and tending. (minimum acreage is required)

PRESCRIBED BURNS

Lands and Forests Consulting have completed numerous ecological and silvicultural prescribed burns throughout Ontario. We specialize in restoration of Tallgrass Prairie and Black Oak Savannah.

If you are considering establishing or restoring one of these rare ecosystems call us first.

AGGREGATE PIT COMPLIANCE

After completing an inspection of the site, Lands & Forests Consulting will complete a Compliance Assessment Report as required under the Aggregate Resource Act and will forward copies to the Ontario Ministry of Natural Resources and to all appropriate Township and County offices.

PARTNERS & MEMBERSHIPS

THE ONTARIO FORESTRY ASSOCIATION

WOODLOT ASSESSMENTS

Lands and Forests' Foresters will meet at your property. We will evaluate your woodlot and make recommendations. In consultation with the landowners, we will formulate an action plan to improve the health and quality of the forest.

TREE MARKING

COMMERCIAL IMPROVEMENT HARVEST OF LOGS & FIREWOOD (HARDWOODS, PINE PLANTATIONS & CEDAR):

The woodlot is inspected and the trees that will not improve in size and quality over the next harvest cycle are marked for removal. This includes the defective, diseased, over-crowded and over-mature trees. The species and total number of trees marked are recorded, then an estimated value is calculated from the volume; this information is then forwarded to the landowner.

ADVERTISING

Your woodlot will be advertised to over 100 log buyers and fuelwood operators. Bids will come directly to you.

TENDERING

We can provide assistance and advice on tendering procedures, collecting the bids, contract negotiations, prices and quality control of harvest operations.

HARVEST SUPERVISION

Lands and Forests' staff will supervise the harvest of logs and firewood from start to finish. We will ensure the operation meets the quality and standard set forth in our contracts.

MANAGED FOREST TAX

INCENTIVE PLAN

Lands & Forests Consulting will complete management plans for private woodlot owners, companies, and municipalities which will provide, on a tree type basis, detailed management strategies and suggestions to help the landowner meet their own management objectives. Our management plans are professionally formatted to allow qualification for the Managed Forest Tax Incentive Program. We have Plan Approvers on staff. This program entitles the Landowner to a major property tax reduction.
